Skills	Languages: HTML, CSS, JavaScript, Python Front End: React, Redux, JQuery, Styled-Components, Material-UI, Bootstrap Back End: Node.js, Express Database: SQL, NoSQL Platforms: Google Cloud Platform's App Engine, AWS RDS, AWS Lightsail

Portfolio

Full portfolio can be viewed at https://nam.codes

Snap Menu: A website for restaurants to upload their menus and generate a unique QR code for customers to view their menu without the use of paper menus. Users can manually upload items or bulk upload using a CSV file. MySQL database is deployed using AWS RDS.
- Git Repository: https://github.com/namnguyen21/qr-menu
- Deployed Site: https://snapmenu.us
- Video Demo: https://www.youtube.com/watch?v=6e7ne5X9fes
- Tools: JavaScript, React, Redux, Styled-Components, Express, MySQL

Projectify: Led a **remote** team of four in the design and implementation of a project and task manager. The app utilizes web sockets for real time changes and communication, including project-specific chat functionality. Conducted daily stand ups via Zoom and maintained communication via Slack.
- Git Repository: https://github.com/namnguyen21/projectify-updated
- Deployed Site: https://projectify-test.herokuapp.com
- Video Demo: https://www.youtube.com/watch?v=DsHuuDnm4Z4
- Tools: JavaScript, React, Redux, Material-UI, Express, MongoDB

Experience

Thing Down - *Software Development Intern (September 2020 - Present)*
- Developed a chrome extension prototype designed to promote responsible and economical consumption.
- Developed a web application with user authentication (oAuth and local) and mailing service.
- Deployed web application and MySQL database using an AWS Lightsail instance, and configured SSL.
- Worked alongside PM in brainstorming effective messaging tactics to target and cater to users.
